 Participation of a Social Enterprise specialising in the assembly of our products

INCLUSION LEVEL

The stated inclusion level determines how accessible our equipment is to a child with motor impairments.

The level is evaluated on a scale from 1 to 3 and is based on the ADA Standard (Americans with Disabilities Act).

ANCHORING THE EQUIPMENT

The type of anchor fixing (A or B) depends on the equipment's technical characteristics and the type of surface where it will be installed. Ask your Area Manager for advice.

Type A
*JXXXX: Anchored under ground in a concrete footing.

Type B
*JXXXXB: Fixing on a concrete slab that has already been laid or will be laid before the equipment is installed.

FOR OVER 35 YEARS, *Proludic has been designing, manufacturing and installing playgrounds and sports areas around the world*

Our mission

True to our values, we are focused on our mission of creating playgrounds and sports areas where users can thrive, develop their skills and improve their wellbeing.

We design, manufacture and install products and play spaces offering the highest quality and

safety. Our universal, innovative and inclusive solutions are tailored to meet the wide range of needs among children, teenagers and adults.

We also strive to transform play areas into social hubs that promote and enhance community life.

Our values

Experience

Since 1988, Proludic leverages its accrued operational expertise to offer customers exceptional support and guidance when it comes to developing and implementing their projects.

Innovation

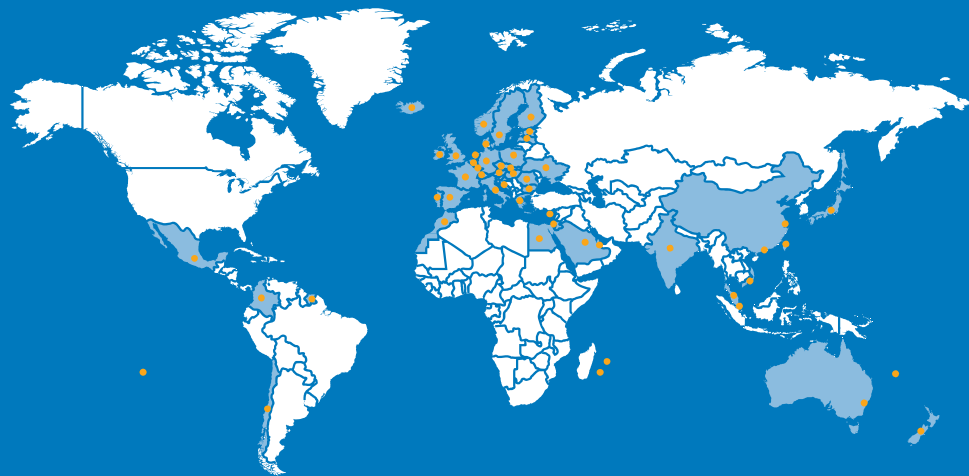

Proludic harnesses its combined resources to extend and upgrade its product range to reflect the changing needs of today's generations and tomorrow's world.

Commitment

All our employees share the company's determination to see children thrive, while fostering wellbeing for everyone and enhancing customer satisfaction.

Proximity

All around the world, local teams are ready to respond and bring a dedicated and professional approach to each playground and sports area project.

A certified environmental approach

Integrated expert knowledge

Our in-depth knowledge of children is the driving force behind every project

On a daily basis, our teams are dedicated to spearheading projects that enhance their proficiency in understanding children's development through:

- Working alongside childhood specialists.
- Gathering insights into the latest lifestyles and trends.
- Observing and analysing how children behave on their own and as part of a group, within their educational play environment.
- Planning to ensure that play experiences promote the development of children's motor, sensory, cognitive, creative and social skills.

Design is intricately woven into the very fabric of Proludic's identity

Proludic's in-house Research & Development Department is a powerhouse for pioneering innovative ideas that comply with applicable standards.

Our designers are responsible for masterminding cutting-edge concepts and product ranges geared towards the expectations of children and adults alike. We also have a long track record in developing bespoke and personalised projects.

- 6 designers and 15 technical engineers.

Integrated manufacturing processes

To better deliver superior efficiency, flexibility and quality, Proludic's manufacturing and distribution functions are based out of the company's head office.

- 70 qualified workers.
- Ability to work with a wide variety of materials, including wood, metal, rope, composites and plastics.
- Quality control and testing on materials and equipment.

Production processes are controlled and managed entirely within the company, meaning that Proludic can manufacture custom products and unique designs with greater responsiveness.

Landscape design

Your project is unique to us!

Each project starts with an initial meeting. This allows us to get to know you as a client and understand your needs, so we can provide a tailor-made design solution in keeping with your brief.

Our combined knowledge and expertise ensure your needs will be carefully assessed and that we will provide you with advice to ensure consistency across your play area project in terms of products, location, layout and environment. Following this initial consultation, we are then able to create the most desirable project design to realise a harmonious and attractive end result.

- 300 salespeople are in the field every day, across the world.
- Landscape designers are at your service.

Installation & project management

Proludic project manages each play and sports space project from the time you place your order, through to project completion and beyond.

Our services include:

- Installation of play and sports equipment
- Landscape integration
- General layout works
- Laying safety surfaces
- Aftersales service
- Servicing and maintenance

We carry out all our work in line with the project objectives and follow the required safety requirements.

Aftersales service

We are here to help, long after your project is installed.

If there is anything you need, we will get back to you as quickly as possible.

Our promise to you?

90% of requests are processed within 24 hours

80% of spare parts are shipped within 5 working days

A proactive environmental policy

Proludic is a company dedicated to quality and responsibility from its very beginning that operates as a professional organisation in the childhood development sector. The company's commitment to driving initiatives aimed at protecting the environment and laying the foundations for future generations has consistently been clear.

Proludic's environmental policy is based on 3 solid cornerstones:

- Sustainability
- Fight against climate change
- Proximity and local presence

For each of these, we have identified indicators that allow us to check on our performance so we stay on track.

CORNERSTONE 1: *Sustainability*

We offer playgrounds and sports areas with design solutions that are capable of standing the test of time... and withstanding all weather conditions. From the outset, our products are engineered to incorporate sustainable materials.

Cornerstone 1 is underpinned by the following indicators:

The average repairability rate equipment is **9.12/10**

90%
of our older play areas are completely functional (average age 16 years)

Proludic equipment is perfectly resistant to extreme weather conditions

CORNERSTONE 2: *Fight against climate change*

Our goal is to continue to reduce our carbon emissions by concentrating on the activities that make up 80% of our carbon footprint. To do this, we are undertaking steps to control our carbon impact throughout the life cycle of our products.

Cornerstone 2 is underpinned by the following indicators:

75% of our products contain eco-materials, **88%** contain recyclable materials

93%
of our production waste is recovered

Our entire supply chain is optimised

CORNERSTONE 3: *Proximity and local presence*

We are committed to setting up and promoting a local network with our customers, our suppliers and the providers with whom we collaborate. Cornerstone 3 is underpinned by the following indicators:

94%
of our suppliers are European

93%*
of our projects begin with a preliminary on-site assessment

100%*
of sites visited by one of our team during the project

* based on UK data 2023

Check out all the indicators within our environmental policy on our website and in our brochure:

Playgrounds: a shining example of inclusion

What is an inclusive play area?

Integrated play area

Inclusive play area
designed
by Proludic

An inclusive play area is a space featuring an accessible layout and a range of play equipment so that children can express themselves, play together and progress at their own pace and to the best of their abilities.

Our inclusive play areas offer products that have been designed to accommodate various disabilities, without ever creating any stigma in how they are used or perceived:

-  motor
-  sensory disability (visual and auditory)
-  intellectual impairments, autism...

« All children must have access to play and to the same play facilities. »

Inclusion review

Proludic's expert teams have the necessary skills to review our customers' play areas and assess their level of inclusiveness. From the selection of equipment to the definition of the desired motor or stimulation activities, surface treatments, movement within the space, access to the play area, presence of suitable furniture, special signage and more... all aspects need to be studied to guarantee a successful design that is accessible to as many users as possible.

Inclusive flagship products

Check out our inclusive products on our website:

Identify all our inclusive products in this catalogue with this pictogram: The level is evaluated on a scale from 1 to 3 and is based on the ADA standard (Americans with Disabilities Act).

Some of our products are assembled in an inclusive process involving people with disability employed in a Social Enterprise. When you choose one of these products, you are contributing to the professional integration of individuals with disabilities.

The products are identified by this logo in the catalogue:

Inclusive All-Terrain Vehicle p 182

Inclusive Seesaw p 183

Roundabout p 190

Pod Swing p 216

Are you planning to create an inclusive play area?

Our "Inclusive play areas" guide provides you with all the answers to help you create your inclusive layout. We have designed our catalogue working closely with the Proludic Observatory experts and NovaChild, a network of universal design experts, healthcare professionals and associations for disabled children's associations committed to improving wellbeing for children through the power of innovation. The catalogue features appropriate solutions in terms of products and designs to ensure that playgrounds can be enjoyed by everyone.

Check out our dedicated page at proludic.com:

The 7 key points when designing an inclusive play area

A successful inclusive play area must be accessible to as many users as possible and balance different needs according to disabilities. Based on the 7 principles of universal design for accessibility and disability, Proludic has defined the key points to consider when designing an inclusive play area. Universal design refers to products and equipment that can be used by everyone, with no adaptation or special design required.

1

Assist orientation by organising movements (markers, instructions, markings on the ground) and adapting signage to suit different disabilities

2

Encourage group play
by breaking down isolation
and developing communication

3

Stimulate the senses

to compensate for disabilities and promote development (use colours, textures, sounds)

4

Protect and ensure safety

by integrating accompanying persons and enclosing the play area with a fence

5

Facilitate use

by focusing on low-level activities and ensuring easy access to equipment using ramps, low floors or safe steps

6

Create accessible designs

with easily accessed entrances and exits while organising the space to allow smooth and pleasant movement

7

Consider everyone

by choosing equipment that offers activities for several types of disabilities while also integrating children without disabilities

Grafic Games: unique graphic designs for truly original playgrounds

Original, innovative and audacious all at the same time, the Grafic Games decorative technique has been developed to personalise all our play structures. This technique allows a project to stand out from the crowd and brings tangible added value to your playground.

- Proludic's internal teams are experts in using this technique.
- The finish can be applied to all compact composite and lacquered plywood panels.
- The varnish finish improves the graphics' resistance to graffiti removers.
- The warranties are the same as for all HPL (High Pressure Laminate) compact composite and lacquered plywood panels.

GRAFIC GAMES: a decorative technique to satisfy all your needs

- Corporate identity
- Customised designs reflecting the local heritage
- Greater play value
- Theme-based graphic designs
- Collaborative projects

*Any other ideas?
Our imagination
has no limits!*

Bespoke projects, you dream it... we create it

At Proludic, the only thing that we like more than being part of your project dreams, is turning them into a reality!

Drawing strength from our expertise in design, engineering, manufacturing and installation, we combine creative flair and high standards to create unique and spectacular designs.

We delight in the challenge of breaking the mould, starting with a blank canvas and breathing life into all our customers' ideas.

Our creations come to life in the most varied play environments with larger, taller, themed and completely personalised products.

Tribute to a legend of fantasy cinema

**Cinéma Odeón Multicines
Tres Cantos**
Madrid - Spain

Find out more

The magic of the cinema continues out into the open air with this iconic figurative structure, a legend of the "seventh art".

Installed as an extension of a cinema, King Kong stands out with his origami-inspired geometric shapes. Inside the gorilla, a series of balancing and rope components must be overcome to reach the 8.75 meter high conical tower, reminiscent of the Empire State building.

This inclusive, contemporary and powerful original creation enhances the cultural impact of the venue where it is situated.

Raising awareness of biodiversity and its protection

Oxford Island

Craigavon - Ireland

Oxford Island is a nature reserve on the shores of Lough Neagh, one of Europe's largest lakes. It's a great place for children to discover and observe the local flora and fauna.

Here, nature and play go hand in hand, with a 1300 m² play area made entirely from Robinia wood. Each structure has a link with one of the species of the ecosystem found on the island and enhances the process of learning about and raising awareness of the environment all around the users. The key premise is learning while having fun, and getting to know the animal and plant world.

Surrounded by reeds and unstructured trees, the nesting tower, squirrel hut, badger den, eel slide and balancing rope forest are all waiting to be discovered by curious and active children. Numerous educational panels, sound games and optical effects are spread around the inside of the structures and throughout the space.

A 21 meter long ramp gives children in wheelchairs access to the very heart of the game and immerse themselves fully in the edutainment activities on offer.

Customised graphical design to inspire learning

Zoodyssée animal park Villiers-en-Bois - France

The Zoodyssée animal park shines the spotlight on Europe's wildlife while pursuing a set of educational and ecological aims.

This playground draws its inspiration from the scientific expeditions associated with the 'Canopy Raft' and encourages children to role play as being scientists, including botany, as they discover the Guyanese biodiversity.

The space features a central structure standing at 7 meter high with an observatory offering 360-degree views and topped with an airship. Canoes and a platform transformed into a research laboratory for studying tropical plant and animal species add the finishing touches to the playground.

Discover the playgrounds at
the Zoodyssée animal park

Appropriation and transposition of local heritage

Riplay

Ribe - Denmark

This play area uses the medium of games to teach children about the history of the town.

3 iconic structures stand out on either side of a 109 meter long obstacle course, the largest in the country: a medieval castle with 4 towers, echoing the former Riberhus Castle; a 6 meter high tower referencing the Storm Flood, the column commemorating the town's historic floods and a two-platform rope bridge inspired by Viking houses.

MULTIPLAY EQUIPMENT

Diabolo & Diabolo Baby	22
Kanopé	42
Ixo	74

Multiplay equipment is designed to make children move without them even realising!

For young children: the variety of play elements and how they're incorporated into the structures are designed to challenge their motor skills. At the same time, they encourage their curiosity and sense of discovery. For older children: there's an opportunity to put themselves to the test - to slide, climb, turn and cross - to go a little faster and take a few risks.

Multiplay equipment is all about getting children to be active. But it also has an important role in nurturing fun, joyful interactions between children by creating a place for a group of children to play together.

DIABOLO
MULTIPLAY EQUIPMENT

Diabolo is an essential component of any play area. With platforms ranging in height from 60cm to 177cm, and with many diverse play elements, the Diabolo range is suitable for children from 6 months to 12 years old.

The modular nature of this range allows for multiple combinations. These can be adapted to a specific age range, or used to encourage interaction between children with different capabilities due to age differences or abilities.

The classic 'must-have' play features are included on each structural element. Varied and complex on more elaborate combinations, these features offer children more opportunities to discover, be challenged and have fun.

Diabolo is available in two colour palettes: "Zingy" (yellow, orange and green) and "Pastel and Wood" (lagoon blue, apple green and oak).

A range designed for toddlers

The Diabolo Baby range is dedicated to early childhood. The structures are designed to encourage early learning, guiding young children through a sequence of activities that stimulate their motor and fine-motor skills and support role play and interaction with others.

All activities take place at ground level or a maximum height of 60cm. All play elements are varied, relevant, adaptable and modular.

Diabolo Baby, a range meeting the developmental and wellbeing needs of children from 6 months to 5 years:

Helping young children discover new motor skills

On all fours, children move forward in a confined space.

Moving forward on a slope, holding narrow shapes that are raised and spaced apart.

Moving in an area surrounded by empty space.

Going underneath.

Understanding obstacles

Developing their sensorimotor and psychomotor skills

Encouraging fine motor skills through the movement of shapes along a defined path.

Exploring how different objects look: colours, transparency, distorted reflections, light/dark contrasts.

Developing awareness of shapes (square, round, triangle)

Resolving play tasks using the manipulation of simple shapes that use thought, memory, learning and reasoning.

Experiencing different textures (raised diamond shapes, grass effect, rough surfaces).

Supporting their social development

Learning to play and interact with others.

Developing their imagination through role play

Encouraging children to help each other.

Climbing, sliding, crawling, sharing, inventing... GROWING!

KANOPE
MULTIPLAY EQUIPMENT

The Kanopé range, with its structures resembling wild grasses or tree trunks bent by the wind, invites children to venture into nature.

Children from two years of age can navigate a pathway that's horizontal or vertical, steep or moving. They can climb in all directions, clambering up and down numerous uniquely-shaped rope structures. They can pretend to be acrobats or tightrope walkers, or they can slide down a rope, a traditional slide, or take the plunge using the Speed Slide.

All play features fit with Kanopé's signature design – inspired by nature, with a contemporary, streamlined look.

The range is available in two styles: evergreen and oak effect.

KANOPE - THE TOWERS

MULTIPLAY EQUIPMENT

Kanopé is reaching for the skies with playful structures of between 4 and 8 meters in height.

For the youngest children, from the age of 2, Ka'Yop's enchanted trees offer a multitude of activities at each level: the lower section features a set of collaborative and inclusive play components. Play panels, sound-play features, a climbing net, moving seats and rotating play equipment are spread over the various structures. The upper part, with its lush green foliage, transforms the tree into a leafy cocoon that is home to a wide variety of motor and sensory activities.

These majestic, ethereal, transparent tall towers stand out in any environment. The asymmetric play houses perched at the top can be reached by climbing steep rope stairs. Large slides offer a guaranteed thrill ride on the way down!

KANOPE - THE INCLUSIVE TOWERS

MULTIPLAY EQUIPMENT

THE KANOPE TOWERS

are models of accessibility and inclusion

Neither the size nor the height of a tower must pose an obstacle to group play among children with different abilities.

Kanopé Towers demonstrate this with access solutions and fun features tailored to children's disabilities that allow everyone to meet up and play together.

J56012®

See technical details on p. 68

LARGE TOWERS WITH A DIRECT CONNECTION ENSURE GUARANTEED GROUP PLAY

Ascent using a rope net and descent using a spiral slide for maximum challenges and sensations.

Transparent fencing so the user maintains visual contact at each level of the tower.

A first platform at a height of 1.80 meters allowing space for fun activities below.

1.80 m

Stairs with a built-in transfer platform.

A double slide to allow an accompanying person to slide alongside the child.

The concept of an **INCLUSIVE** Kanopé Tower

3 separate areas are defined according to a classification based primarily on the level of motor disability (an essential component in equipment design) and inspired by the GMSCF* classification.

Level 1

Children with slightly reduced motor abilities or children without disabilities.

Level 2

Children with motor disabilities that may use a mobility aid, are able to exit their mobility aid with appropriate support to explore the play equipment with or without assistance.

Level 3

Children with significant motor disabilities, who are unable to move independently from a wheelchair or move around.

Spaces feature a modular design and can be combined to create a bespoke solution meeting all your needs, such as:

- ▶ The desire to create a fun and inclusive play solution for a specific disability category
- ▶ Additional fun components suited to different disabilities
- ▶ A solution tailored to the available budget
- ▶ Available floor space

J56009®

J56010®

J56011®

J56012®

Each area includes fun and practical components that also address specific needs for sensory and cognitive disabilities.

*GMSCF = Gross Motor Function Classification System

2

A UNIQUE OPPORTUNITY FOR CHILDREN WITH MOTOR DIFFICULTIES TO ACCESS A SLIDE MEASURING 3 METERS IN HEIGHT

A tube slide, either straight or with very gentle curves to be used by children who do not have complete control over their lower limbs. Large peepholes to see out of and reassure the child and accompanying person.

It is accessed from a soft rubber ramp that allows the ascent to be made in either a horizontal position or standing.

The height of passages must allow them to be used by an accompanying person or an adult with a disability.

2

3

IMMEDIATE INCLUSION IN PLAY FOR CHILDREN IN WHEELCHAIRS OR WITH MOTOR DIFFICULTIES

Stairs with a built-in transfer platform.

Suitable ergonomics: ramp with an incline of < 6°, wide platform to facilitate easy movement in a wheelchair.

IXO
MULTIPLAY EQUIPMENT

The Ixo range speaks the language of pre-teens.

No longer satisfied with playing the same games as younger children, pre-teen want to be challenged - to test their strength, to prove themselves in the eyes of others, to make their own rules.

Inspired by modern architecture, the Ixo range is contemporary in style, with clean lines and transparent structures.

The range is available in two styles – choose from metal or wooden posts - to create a more urban or more natural effect.

THEMED EQUIPMENT

Adventure	86
Metropolis	100
City	108
Aquatica	122
Medieval	130

Our themed play equipment fires up the imagination. Children can dream of being adventurers on boats, trains, rockets and fire engines. They can imagine lions and dinosaurs. They can create their own world around our playspace themes: Adventure, Metropolis, City, Aquatica and Medieval.

They can express themselves freely, stimulated by the many details and unique elements on every piece of equipment.

ADVENTURE
THEMED EQUIPMENT

Our Adventure-themed equipment transports children into the leafy undergrowth of the jungle. Whether climbing aboard a jeep or carefully crossing the suspension bridge, young explorers can go in search of a secret temple and come face-to-face with wild animals along the way.

Each structure is equipped with a range of play elements that challenge and stimulate the senses.

The use of an orange, brown and green colour palette, emphasises the tropical forest theme.

METROPOLIS
THEMED EQUIPMENT

The Metropolis range welcomes children to a world that draws its inspiration from the books of science fiction writers such as Jules Verne and H.G. Wells. The play structures are weird and wonderful machines, each complete with unique design details and imaginative play features.

The combination of stainless steel posts and copper coloured play panels reinforce the futuristic look of the equipment.

CITY
THEMED EQUIPMENT

The City theme takes children on a journey to an imaginary urban environment where they take on the role of a fireman, ambulance driver, postman, train driver, or even a passenger on an open-top bus.

The equipment is packed full of play features that are ideal sources of inspiration for role-playing games, as well as for the development of fine motor skills.

MEDIEVAL THEMED EQUIPMENT

The Medieval theme transports children to a world of knights, castles and chivalry.

Symbols from this period such as turrets, shields and bridges adorn the play equipment. When combined with children's imagination the equipment becomes the starting point for a host of fun adventures. The numerous play panels add to the theme and test children's problem-solving skills.

ORIGIN' ROBINIA WOOD EQUIPMENT

Multiplay equipment	138
Themed equipment	146
Traditional equipment	154
Trails	160

The Origin' range of play equipment recreates the very essence of what nature has to offer: a treehouse, crossing a stream over stepping stones or an uprooted tree trunk, an adventure trail that includes climbing, sliding and discovering, an encounter with animals or birds, a walk along a forest trail or venturing downriver.

Here, children play in a setting inspired by nature. Their senses are awakened and stimulated by the look and feel of the Robinia wood with its naturally irregular forms and enjoyable sensation beneath the fingers.

The play equipment in the Origin' range is designed for children aged one and above.

ORIGIN' MULTIPLAY EQUIPMENT

ROBINIA WOOD EQUIPMENT

All children have the same dream of hiding away in a treehouse.

The multiplay structures in the Origin' range promise a number of original adventures in the heart of the natural countryside combining equipment with basic play features that will bring children together, including triangular towers with different platform heights, ladders, climbing ramps, fixed or moving bridges, tunnels, vertical nets, climbing walls, slides and sliding poles.

The highest combinations on offer stand over five metres tall and are adorned with unusual features, such as a stork's nest, the trees around the clearing and dilapidated cabins.

Splashes of colour truly bring out the originality of this range. The larch fence panels and playhouse walls are finished in shades of green to give an extra touch of natural harmony with the surrounding environment.

ORIGIN' THEMED EQUIPMENT

ROBINIA WOOD EQUIPMENT

Children love escaping to an imaginary world where anything can happen. Whether on land, at sea or in the air, they pretend to be explorers, seafarers, merchants or aviators. They produce and act out fantasy stories with plenty of twists and turns that epitomise their creativity.

The structures with their imaginative shapes offer a wealth of details for enhancing the play experience.

Some provide traditional and must-have activities, while others contain countless accessories or play with perspective, such as optical illusions.

ORIGIN' TRADITIONAL EQUIPMENT

ROBINIA WOOD EQUIPMENT

Swings, springers and roundabouts are firm favourites among children of all ages. They can be installed near each other or added to a play space built around a multiplay structure.

Comprising of Robinia wood boards, posts and beams, Origin' structures embrace the shape of the wood, which gives the playground a highly intensified natural look.

ORIGIN' TRAIL EQUIPMENT

ROBINIA WOOD EQUIPMENT

The Origin' trail equipment offers different levels of difficulty. The most accessible items include stepping stones, beams and low gangways, which help children to work on their sense of balance and overcome their fear of heights.

The equipment gradually becomes narrower, higher and more challenging. Children can gain a foothold on the rounded beams, moving gangways and flexible ropes. Various techniques are used to cross the different items of play equipment. Those techniques gradually scale in complexity with the aim of helping children coordinate their movements and control their body in suspended space.

Finally, they can improve their technique, strength and self-control on the climbing equipment or structures where they need to use their arm strength to get from one side to the next.

ORIGIN' ROBINIA WOOD EQUIPMENT

MOVING EQUIPMENT

Springers 172
Rotating equipment 186
Cableways 194

Popular with younger and older children alike, moving play equipment provides a key focus of activity, offering a wide variety of sensations: swinging and balancing, rocking and gliding, moving through space, fast and slow.

Children will love the dynamic experience of our cableways, spring motion and rotating equipment.

SPRINGERS

MOVING EQUIPMENT

Springers are an essential element of any play space for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they swing away wildly.

Springers are equipped with suitably-sized footrests and handles, so they're ergonomically designed for maximum user comfort and safety. Their playful and colourful shapes are based on familiar themes, designed to stimulate a child's imagination.

ROTATING EQUIPMENT

MOVING EQUIPMENT

Children of all ages love rotating equipment.

Younger children gradually learn to enjoy the exhilaration of speed on roundabouts. As children get older and more self-assured, they can test their balance and push their limits on more challenging dynamic structures that combine rotation and swinging.

CABLEWAYS

MOVING EQUIPMENT

Cableways offer an essential, fun aspect to active play areas for pre-teens and teenagers. Not only will they enjoy the thrill of gliding through space, cableways are also a great way to teach children of all ages to cooperate, take turns and share.

Young people can both challenge themselves and compete with others. They can develop their own technique and build strength and agility while they play.

TRADITIONAL PLAY EQUIPMENT

Playhouses 202
Swings 208
Slides 220

No playground would be complete without certain classic play items like playhouses, swings and slides. This equipment offers great places for children to play alone or with others. Other play elements offer heightened sensations that go with sliding and swinging.

Whether used as standalone items or to compliment multiplay structures, they're fundamental to any play area design.

PLAYHOUSES

TRADITIONAL PLAY EQUIPMENT

The playhouses provide wonderful places for young children to play or socialise.

Their shapes, style and cleverly designed accessories take young children into an imaginary world where they can pretend be shopkeeper, teachers or chefs...

SWINGS

TRADITIONAL PLAY EQUIPMENT

Swings are a traditional play item and an all-time favourite that has given many generations of children the sensation of flying through the air and the joy of seemingly touching the sky! Although the sheer pleasure that comes from swinging remains unchanged, swings are now available in all shapes and sizes.

Wraparound seats or braided rope seats just 40cm above the ground guarantee safety for the youngest of users. Older children can have fun together on the 1.20 meter diameter pod swing or the braided balancing rope. The hexagonal swing with its six sets of seats offers children an even greater set of challenges.

1 Swing chains.

Galvanised steel overmoulded with rubber. (pod swing)

2 Rotation system fitted with bearings.

3 PVC sliding rings prevent wear on the metal parts.

4 The rotation system enables swinging in both directions. A safety chain strengthens the pod support. (pod swing)

5 Anti-wrap round rotation system. Made of polyamide parts and stainless steel fixings.

6 The inclusive seat has a high, wrap-around seat made from rotomoulded polyethylene with holes to prevent water stagnation, and a rubber shock-absorbing system. An anti-fall sling harness with a secure fastener ensures that children are held securely.

SLIDES

TRADITIONAL PLAY EQUIPMENT

Forever popular, slides are an integral element of a child's world.

For younger children, there are wider steps that provide a stable base for safe access, while older children climb up a ladder.

Straight or wavy slides, stainless steel tubular structures, polyethylene Kayak slides – the variety of shapes, lengths and materials provide multiple solutions for developing a play area and adapting it to any type of environment.

CLIMBING & BALANCING EQUIPMENT

ACTI'Ninja trails	228
Rope trails	234
Trampolines	238
Rope structures	240
Climbing structures	248

Balancing and climbing equipment encourages children to test their agility, spatial confidence and motor coordination.

ACTI'Ninja obstacle courses, urban parkour-inspired modules, pyramids, trampolines, climbing walls... the wide variety of equipment present different levels of difficulty appropriate to the children's age and abilities.

ACTI'NINJA TRAILS

CLIMBING & BALANCING EQUIPMENT

The Ninja trails are fun-sport obstacle courses intended to develop the physical fitness of children and teenagers aged from 6 to 14 years. They consist of modules that can be linked together and which have to be completed as quickly as possible using one's strength, balance, endurance and dexterity to beat the stopwatch that is triggered at the starting line.

The great variety of the proposed modules makes it possible to adapt the level of difficulty of the trails to the age of the children: easy for those aged 6 to 8 years, difficult for those aged 8 or over.

The graphic presentation with a coloured, learning-oriented soft surface makes it possible to create a dynamic, challenging environment.

ROPE TRAILS

CLIMBING & BALANCING EQUIPMENT

Ropes circuits turn children into tightrope walkers!

They move along small, unstable surfaces, spaced tubes or inclined stepping stones, requiring constant balancing as they navigate from one obstacle to the next. This challenge develops and strengthens motor coordination, agility and concentration.

Each structure, regardless of its size, is an adventure playground delivering an experience that is both stimulating and fun: the moderate risk (strap and rope height: 40cm) inspires every child's courage and taste for a challenge, and every step they take boosts their self-confidence.

TRAMPOLINES

CLIMBING & BALANCING EQUIPMENT

Trampolines give children wings and are the ultimate in fun!

Trampolines are simple to use and available to children aged 3 and above. They develop motor skills, coordination, balance and muscle strength. In the air, children become aware of how their body feels and as a result improve their posture.

Trampolines rightly belong in any inclusive play area. Ground-level trampolines are protected by a frame with rounded edges and ensure easy access to the centre for children in wheelchairs with a helping hand from a carer or friend, so that they too can gently experience the sensation of bouncing.

The steady bouncing motion of the trampoline can have a calming effect on over-stimulated and autistic children.

2

ROPE STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Designed in 3D, rope structures allow children to take complete ownership of the space, making use of both the peripheral and inside sections of the equipment. Crossing requires concentration and good hand-foot coordination to best manage the instability of the ropes and, in some cases, the suspended stepping stones at the centre of the structures.

By going higher, children expand their perception of space. Although the same climbing techniques are used from start to finish, the most valuable lesson for children will be overcoming their fear of heights.

Rope structures can be connected to other types of play equipment, such as slides and climbing walls, or incorporate aerial trails to move from one module to the next without putting a foot on the ground.

CLIMBING STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Climbing structures attract children and teens who love climbing and playing at height.

Nets, climbing walls, ladders, horizontal bars, a 4 meter-high pole... the equipment is varied and presents different levels of difficulty and technique appropriate to the age of the users. Users are required to move across horizontal, vertical and sloping surfaces, which calls for balance, agility and coordination.

These structures also encourage children to play together. They can compare their skills, throw down the gauntlet or help each other overcome a difficulty and progress along the structure. The enjoyment of playing comes top of the list, which promotes interaction and socialisation.

CLIMBING & BALANCING EQUIPMENT

EDUCATIONAL & SENSORY EQUIPMENT

GymLudic® trail & Balancing modules	258
Play panels, Audio & Musical play	262
Sand play, water play and gardening	270
Interactive play	276

Educational and sensory play helps children grow and improve their abilities by nurturing their cognitive, creative and social skills.

Trails hone their motor skills and encourage them to take risks. Play panels develop concentration and observation through play. Playing with sand, water and soil stimulates the senses, increases motor skills and inspires creativity in the youngest children. Musical play activities help activate children's hearing. Interactive play activities arouse keen observation, movement skills and quick response.

All these play elements encourage children to socialise through play.

GYMLUDIC® TRAIL & BALANCING MODULES
EDUCATIONAL & SENSORY EQUIPMENT

The GymLudic® trail and the balancing modules are ideally suited to educational programmes aimed at scaling up skills development and learning in young children through a series of actions requiring increasingly complex and coordinated motor skills. They encourage children to enrich and improve a wide range of abilities, including locomotor skills, balance and coordination, and how to conquer their fears.

GymLudic® is an educational play structure featuring up to 80 activities for stimulating children's motor skills.

This system is supplied as a compact, folding box and provides a number of exercise opportunities involving balancing, jumping, crossing, throwing and space management. Activities are concentrated in and around the box. They can be sequenced to form a trail or performed individually depending on the required learning objectives.

Thanks to its modular design and various accessories, teachers can provide scalable exercises with different levels of difficulty. Children can therefore enhance their motor and psychomotor skills over time.

The shape and complexity of the different balancing modules allow for a wide variety of crossing activities.

PLAY PANELS, AUDIO & MUSICAL PLAY
EDUCATIONAL & SENSORY EQUIPMENT

Engaging and fun, children enjoy using interactive play panels like Sensory Flowers and Tubophones.

Understanding play activity instructions on the panels help develop their observation and analysis skills. Performing the activities demands concentration and thought. It helps develop hand-eye coordination and strengthens their ability to plan.

Musical play activities stimulate their auditory perception and helps develop creativity and encourage interaction with other children.

SAND PLAY, WATER PLAY AND GARDENING

EDUCATIONAL & SENSORY EQUIPMENT

The handling of water, sand and soil is a great source of sensory experiences. Children enjoy themselves working with these materials whose properties allow a multitude of experiments. They refine control and coordination of hand movements.

They gain awareness of the concepts of shape, state, weight, volume... and learn to understand cause and effect relationships.

Gardening activities also help them understand how they can interact with nature and understand the notion of life growing. In addition, gardening can also help develop children's sense of smell.

INTERACTIVE PLAY

EDUCATIONAL & SENSORY EQUIPMENT

Interactive play experiences combine physical and intellectual activities with technology. Designed for a connected generation, these play activities introduce sound, light and action into the activity. Visual and audio stimuli call upon juniors' cognitive functions, requiring them to use speed and responsiveness.

Group challenges also help develop team spirit, cooperation and cohesion in children.

SPORT FOR ALL - ANYTIME, ANYPLACE, ANYWHERE

Proludic's sports & fitness areas are designed to encourage everyone to enjoy and engage in physical exercise, regardless of their age, abilities, level and objectives. Users can exercise independently on a range of sports and fitness equipment to develop their motor skills while maximising fun.

These mixed-gender and inclusive areas cater to every generation and guarantee an enjoyable and productive experience.

OUR SPORTS & FITNESS RANGES

Making recreational sports for Everyone

Intergenerational
Mixed-gender
Inclusive

Fully accessible fitness stations and apparatus

- Standard or customised designs
- Users can exercise by themselves with the mobile app

Apparatus approved by the World Street

- Workout and Calisthenics Federation
- Mixed, inclusive modules
- Exercises for all levels in the mobile app

Ninja-inspired obstacle courses and Trim Trails

- Varied, inspiring traverses
- Unique concept for children aged 6 and over (more information on p 229)

MULTI-USE GAMES AREAS

Structures for ball games

- Modular, inclusive, durable and safe
- Multiple customisation options

DYNAMIC STRUCTURES

Equipment inspired by extreme sports

- Sports available: kite-surfing, snowboarding, parachuting, windsurfing and climbing
- Rich sports content: heights, speed, slack-lining and rotation

TRAMPOLINES

Equipment for jumping and acrobatic moves

- For children and adults
- Innovation with the 3D version and its lateral jumping surfaces

Check out our complete range of sports and fitness equipment

In our Sports catalogue
(available on our website or on request)

On our website at
proludic.com

We exercise and have fun!

with Proludic's fun sports innovations

Balance board

Objective: balance to keep the bubble stable in the centre of the board

Rodeoboard

Objective: create the movement, apply power and control the inevitable lack of balance

Slanted steps

Objective: make your way over the 5 stepping stones as quickly as possible without touching the ground

and right on target!

Shooting target

Objective: display skill and precision to score as many points as possible

Trampoline

Objective: use the 3D bounce surface to perform jumps and acrobatic moves

Smartphone holder

For selfies, videos and to play music with amplified volume

Smile!

FURNITURE & SIGNAGE

Furniture 284
Signage 288

Leisure spaces are places to relax for all age groups, users and accompanying adults and successful design is achieved through the harmony created between play equipment, furniture and the environment.

Designing a play area, therefore, involves much more thought than just play aspects. Allowing children the freedom to play in a clean, hazard-free location protected from paths and roads is paramount. However, providing parents, carers and users the ability to rest, have a snack and chat also contribute to a successful leisure space.

Classic or contemporary in design, we have furniture suitable for every project setting, which will blend into any environment seamlessly.

Our signs are practical, aesthetic and fun, providing useful information for play area users. Text can vary depending on where the signs are installed.

Aluminum composite panels
(Dibond)

COMPACT COMPOSITE

Our compact composite panels are 13mm thick and they are made up of softwood fibre (70%) and phenolic binder (30%). They show high levels of dimensional stability over long periods.

The material is unaffected by exposure to major temperature variations, guaranteeing the durability and solidity of the assembled elements. It is a versatile material that is not affected by contact with damp or abrasion.

The coloured surfaces are obtained using pigmented resins that provide good levels of resistance to ultraviolet radiation and aggressive cleaning products.

A range of colours has been specially developed by Proludic, enabling the company to highlight the originality of the equipment and its play aspects.

The platforms are made from a textured and non-slip compact material (HPL), 12.5mm thick.

ROBINIA

Robinia is a broad-leaved species renowned for its natural longevity and resistance to external attacks (insects, fungi, inclement weather, etc.) without any fungicide or insecticide treatment.

This wood has been adopted by the construction industry for its natural resistance to rot and is perfectly suited to use as posts offering heavy load-bearing capabilities. After removing the bark, the trunks are used as is without any machining or treatment.

Splinter-free and never too hot, even after prolonged exposure to the sun, Robinia guarantees maximum safety.

Since Robinia is a living material, natural phenomena (greying due to UV light, cracks, etc.) can appear over time, which may alter the initial appearance of the product but without any impact on its intrinsic structural quality.

LAMINATED WOOD

Laminated wood is made up of layers of solid wood (often Fir or Scots pine) glued together. It is a very strong material and ideal for posts that have to carry larger loads.

Its qualities of resistance to dampness and pollution reduce the maintenance costs of the structures and ensure their durability.

Durability is further enhanced thanks to:

- Autoclave treatment of the laminated wood that provides in-depth protection from fungi, insects and termites.
- A surface coating that makes the wood waterproof and protects it from UV radiation.

The timber is free of defects (knots or splits) because they are identified and removed during the cutting work on the laminated strips. It is also free of splinters, which eliminates the risk of injury and is pleasant to touch.

OUR GALVANISED STEEL AND PAINTED GALVANISED STEEL POSTS

Our metal posts are made of 2.5mm thick galvanised steel to ensure the requirements for robustness and safety of play structures are achieved.

The posts provide a guarantee of longevity under widely varying climatic conditions thanks to the steel galvanisation process. The application of a polyester powder coating that is resistant to UV radiation and temperature variations provides further protection.

Proludic has developed its own round or square posts, with a fluted aspect that acts as an effective anti-graffiti screen. The two-toned grain finish reduces the appearance of scratches and ensures the aesthetic integrity of the posts.

OUR PAINTED ALUMINIUM PANELS

Aluminium is durable and strong, making it suitable for many applications. The natural formation of a surface oxide layer enhances its resistance to corrosion.

Application on aluminium of a coat of polyester epoxy paint provides high levels of resistance to UV radiation and temperature variations, ensuring long equipment life in diverse environments.

OUR STAINLESS STEEL TUBES

Stainless steel is a material with high mechanical strength.

Our stainless steel tubes stand up to graffiti, bad weather and urban pollution; they require very little maintenance and are also resistant to even the most aggressive solvents.

OUR PLASTIC PARTS

Proludic selects the various types of plastic based on their properties and intended purpose.

Our plastic parts are non-toxic and resistant to wear, impact, climatic variations and many chemicals. They ensure durability and long life of our play equipment.

All our plastic parts are marked with standard international identification codes, which ensure their traceability and recycling credentials.

OUR ROPES

Our ropes are made of corrosion-resistant galvanised steel wire cable strands covered with polyester. The multi-stranded wire cables remain flexible whilst resisting distortion and withstanding heavy loads.

The strong and durable polyester covering ensures user comfort and protection.

OUR FIXINGS

Our fixings are made of stainless steel to ensure the excellent robustness of our assemblies and resistance to wear, corrosion and climatic variations.

All fixing components are protected by anti-vandal polyamide caps.

OUR MECHANICAL SYSTEMS

Our experience has shown that our products are exposed to extreme mechanical stress.

This has led us to develop specific parts to guarantee an optimum level of comfort, durability and strength. The in-house systems we have developed ensure the reliability of our products while preventing wear, distortion and breakage of mechanical parts.

HERE ARE SOME EXAMPLES:

Springers

The support bracket, made from filled polyamide, provides exceptional resistance, safety and durability to the system.

Swings

The seat mounting brackets are designed to withstand heavy loads. They are made from stainless steel wire and are gently rounded in shape to ensure user safety.

PVC sliding rings limit wear to metal parts caused by swinging movements over time and extend the product life.

Rotation systems

The components used in our rotation systems are selected for their mechanical qualities and guarantee the reliability and robustness of the equipment.

Encased or inserted into connecting parts, our rotation systems are both waterproof and aesthetic.

Guarantees

Proludic is committed to the quality and durability of its products.

In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Lifetime guarantee against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Posts and supporting structures (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes
- Panels (coloured compact / non-slip compact / high density polyethylene)

25 years against structural failure on our sports and play equipment due to material or manufacturing defects on lacquered plywood panels and non-slip plywood panels.

15 years against structural failure on our sports and play equipment due to material or manufacturing defects on the solid wood planks and timber frame posts.

10 years against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Metal components (with the exception of springs, moving or mechanical parts and fixings)
- Planks and treated timber frame posts
- Metal crimps and rope assemblies

5 years against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Springs and mechanical systems
- Moulded or rotary moulded plastic parts (with the exception of moving parts)

2 years against material or manufacturing defects on component parts.

These guarantees include the provision of spare parts or free repair but does not include installation on-site.

The colours reproduced in this brochure may not be true to life, Proludic reserves the right to change specifications and make product improvements to any of our products at any time without notice. Information in this brochure was correct at the time of printing. While every effort has been made to ensure the accuracy of information, Proludic cannot accept any responsibility for any errors or omissions and this brochure does not form part of any contract.
