 Participation of a Social Enterprise specialising in the assembly of our products

INCLUSION LEVEL

The stated inclusion level determines how accessible our equipment is to a child with motor impairments.

The level is evaluated on a scale from 1 to 3 and is based on the ADA Standard (Americans with Disabilities Act).

ANCHORING THE EQUIPMENT

The type of anchor fixing (A or B) depends on the equipment's technical characteristics and the type of surface where it will be installed. Ask your Area Manager for advice.

Type A

*JXXXX: Anchored under ground in a concrete footing.

Type B

*JXXXXB: Fixing on a concrete slab that has already been laid or will be laid before the equipment is installed.

FOR OVER 35 YEARS, Proludic has been designing, manufacturing and installing playgrounds and sports areas around the world

Our mission

True to our values, we are focused on our mission of creating playgrounds and sports areas where users can thrive, develop their skills and improve their wellbeing.

We design, manufacture and install products and play spaces offering the highest quality and

safety. Our universal, innovative and inclusive solutions are tailored to meet the wide range of needs among children, teenagers and adults.

We also strive to transform play areas into social hubs that promote and enhance community life.

Our values

Experience

Since 1988, Proludic leverages its accrued operational expertise to offer customers exceptional support and guidance when it comes to developing and implementing their projects.

Innovation

Proludic harnesses its combined resources to extend and upgrade its product range to reflect the changing needs of today's generations and tomorrow's world.

Commitment

All our employees share the company's determination to see children thrive, while fostering wellbeing for everyone and enhancing customer satisfaction.

Proximity

All around the world, local teams are ready to respond and bring a dedicated and professional approach to each playground and sports area project.

International presence

7 subsidiaries

55 countries

380 employees

150,000 playgrounds and sports areas

Design is intricately woven into the very fabric of Proludic's identity

Proludic's in-house Research & Development Department is a powerhouse for pioneering innovative ideas that comply with applicable standards.

Our designers are responsible for masterminding cutting-edge concepts and product ranges geared towards the expectations of children and adults alike. We also have a long track record in developing bespoke and personalised projects.

- 6 designers and 15 technical engineers.

Integrated manufacturing processes

To better deliver superior efficiency, flexibility and quality, Proludic's manufacturing and distribution functions are based out of the company's head office.

- 70 qualified workers.
- Ability to work with a wide variety of materials, including wood, metal, rope, composites and plastics.
- Quality control and testing on materials and equipment.

Production processes are controlled and managed entirely within the company, meaning that Proludic can manufacture custom products and unique designs with greater responsiveness.

Landscape design

Your project is unique to us!

Each project starts with an initial meeting. This allows us to get to know you as a client and understand your needs, so we can provide a tailor-made design solution in keeping with your brief.

Our combined knowledge and expertise ensure your needs will be carefully assessed and that we will provide you with advice to ensure consistency across your play area project in terms of products, location, layout and environment. Following this initial consultation, we are then able to create the most desirable project design to realise a harmonious and attractive end result.

- 300 salespeople are in the field every day, across the world.
- Landscape designers are at your service.

Installation & project management

Proludic project manages each play and sports space project from the time you place your order, through to project completion and beyond.

Our services include:

- Installation of play and sports equipment
- Landscape integration
- General layout works
- Laying safety surfaces
- Aftersales service
- Servicing and maintenance

We carry out all our work in line with the project objectives and follow the required safety requirements.

Aftersales service

We are here to help, long after your project is installed. If there is anything you need, we will get back to you as quickly as possible.

Our promise to you?

90% of requests are processed within 24 hours

80% of spare parts are shipped within 5 working days

our website.

A proactive environmental policy

Proludic is a company dedicated to quality and responsibility from its very beginning that operates as a professional organisation in the childhood development sector. The company's commitment to driving initiatives aimed at protecting the environment and laying the foundations for future generations has consistently been evident.

In 2015, Proludic joined 12,526* companies across the world in making a firm commitment to supporting sustainable forest management. PEFC (Programme for the Endorsement of Forest Certification) certification guarantees the use of sustainable forest resources. The products in the Origin' range are available in PEFC-certified wood on request.

New in 2025

► The Diabolo range is now available using an increased recycled and recyclable level of raw materials (find out more on page 30).

* Data from the PEFC Global Statistics report published in December 2022

We optimise the cutting of panels to limit leftover scraps.

Proludic's environmental policy is based on 3 solid cornerstones. For each of these, we have identified indicators that allow us to check on our performance so we stay on track.

CORNERSTONE 1: Sustainability

We offer playgrounds and sports areas with design solutions that are capable of standing the test of time and withstanding all weather conditions. From the outset, our products are engineered to incorporate sustainable materials. Cornerstone 1 is underpinned by the following indicators:

The average repairability rate of equipment is **9.12/10**

90% of our older play areas are completely functional (average age 16 years)

Proludic equipment is perfectly resistant to extreme weather conditions

CORNERSTONE 2: Fight against climate change

Our goal is to continue to reduce our carbon emissions by concentrating on the activities that make up 80% of our carbon footprint. To do this, we are undertaking steps to control our carbon impact throughout the life cycle of our products. Cornerstone 2 is underpinned by the following indicators:

79% of our products contain recycled materials
70% contain bio-sourced materials
95% contain recyclable materials

89% of our production waste is recovered

Our entire supply chain is optimised

CORNERSTONE 3: Proximity and local presence

We are committed to setting up and promoting a local network with our customers, our suppliers and the providers with whom we collaborate. Cornerstone 3 is underpinned by the following indicators:

94% of our suppliers are European

93%* of our projects begin with a preliminary on-site assessment

100%* of sites visited by one of our team during the project

* based on UK data 2023

Check out all the indicators within our environmental policy on our website and in our brochure.

Playgrounds: a shining example of inclusion

An inclusive play area is a space that enables every child to enjoy their childhood to the full, thanks to accessible layouts and play equipment that can be shared and allow children to progress at their own pace and to the best of their abilities.

Our inclusive play areas offer products that have been designed for all users, regardless of ability:

motor

sensory disability (visual and auditory)

intellectual impairments, autism...

All children can play in our play areas, sharing the same equipment together.

The 7 key points when designing an inclusive play area

A successful inclusive play area must be accessible to as many users as possible and balance different needs according to disabilities. Based on the 7 principles of universal design for accessibility and disability, Proludic has defined the key points to consider when designing an inclusive play area. Universal design refers to products and equipment that can be used by everyone, with no adaptation or special design required.

1

Create accessible designs

with easy to access entrances and exits and space to allow for safe and comfortable movement.

2

Foster social interaction

and communication by promoting group play.

3

Consider everyone

by choosing equipment that offers activities for children of all abilities.

4

Protect and secure by including carers and fencing off the play area.

5

Facilitate use by focusing on low-level activities and ensuring easy access to equipment using ramps, low floors or safe steps.

6

Assist orientation by using tactile markers, instructions, and surface markings to guide movement, and adapt signage so everyone will understand.

7

Stimulate the senses

to support the development of all children through the use of colours, textures and sounds.

All children must have access to play and to the same play facilities.

Inclusive flagship products

Identify all our inclusive products in this catalogue with this pictogram: The level is evaluated on a scale from 1 to 3 and is based on the ADA standard (Americans with Disabilities Act).

Inclusive Manufacturing

Some of our products are assembled in an inclusive process involving people with disability employed in a Social Enterprise. When you choose one of these products, you are contributing to the professional integration of individuals with disabilities.

The products are identified by this logo in the catalogue:

Check out our inclusive products on our website:

Are you planning to create an inclusive play area?

Our "Inclusive play areas" guide provides you with all the answers to help you create your inclusive layout. We have designed our catalogue working closely with the Proludic Observatory experts and NovaChild, a network of universal design experts, healthcare professionals and associations for disabled children's associations committed to improving wellbeing for children through the power of innovation. The catalogue features appropriate solutions in terms of products and designs to ensure that playgrounds can be enjoyed by everyone.

Check out our dedicated page at proludic.com:

Would you like to evaluate how inclusive your play area is and make it even better?

Proludic's expert teams provide an assessment service to evaluate the inclusivity of your play areas.

We provide evaluations for existing or planned projects to guide decisions on layout and equipment selection, helping you create inclusive spaces.

Our customised assessment provides you with insights into your project needs regarding inclusion and accessibility.

Inclusive diagnosis

The six evaluation criteria for inclusion are based on these principles of universal design for play areas:

Your Area Manager can visit your site and provide free consultation and an inclusive design.

Watch the video to find out more about the components of the inclusion review.

Creating Unique Play Spaces

GRAFIC GAMES

Original, innovative and audacious all at the same time, the Grafic Games decorative technique has been developed to personalise all our play structures. This technique allows a project to stand out from the crowd and brings tangible added value to your playground.

- Proludic's internal teams are experts in using this technique.
- The finish can be applied to all compact composite and lacquered plywood panels.
- The varnish finish improves the graphics' resistance to graffiti removers.
- The warranties are the same as for all HPL (High Pressure Laminate) compact composite and lacquered plywood panels.

► Any other ideas?
Our imagination has no limits!

Bespoke projects, you dream it... we create it

At Proludic, the only thing that we like more than being part of your project dreams, is turning them into a reality!

Drawing strength from our expertise in design, engineering, manufacturing and installation, we combine creative flair and high standards to create unique and spectacular designs.

We delight in the challenge of breaking the mould, starting with a blank canvas and breathing life into all our customers' ideas.

Our creations come to life in the most varied play environments with larger, taller, themed and completely personalised products.

A playful spin on local cultural heritage

Stadium Lucien Desprat

Cahors - France

[Find out more](#)

The town of Cahors is uniquely situated in a moat like bend in a river. On the riverbank across from its historic town centre lies a public park, a stretch of greenery that is home to various attractions based on a distinctive theme: 'Island assault'.

The playground blends seamlessly into this recreational space, setting the scene of a fortress being attacked by pirates. An enormous structure, standing 8 metres tall, takes centre stage here. The signs of the pirates' assault are clear to see, with images of galleons and fearsome faces of buccaneers etched into the walls and flags bearing the emblematic image of a parrot. Children sail down huge spiral slide and set out on amazing adventures. Dotted around are swings and springers shaped like cannons or treasure chests overflowing with gold, carrying on this theme that children know and love.

Raising awareness of biodiversity and its protection

Oxford Island

Craigavon - Ireland

Oxford Island is a nature reserve on the shores of Lough Neagh, one of Europe's largest lakes. It's a great place for children to discover and observe the local flora and fauna.

Here, nature and play go hand in hand, with a 1300m² play area made entirely from Robinia wood. Each structure has a link with one of the species of the ecosystem found on the island and enhances the process of learning about and raising awareness of the environment all around the users. The key premise is learning while having fun, and getting to know the animal and plant world.

Surrounded by reeds and unstructured trees, the nesting tower, squirrel hut, badger den, eel slide and balancing rope forest are all waiting to be discovered by curious and active children. Numerous educational panels, sound games and optical effects are spread around the inside of the structures and throughout the space.

A 21 metre long ramp gives children in wheelchairs access to the very heart of the game and immerse themselves fully in the edutainment activities on offer.

Tribute to a legend of fantasy cinema

Cinéma Odeón Multicines Tres Cantos

Madrid - Spain

The magic of the cinema continues out into the open air with this iconic figurative structure, a legend of the "seventh art".

Installed as an extension of a cinema, King Kong stands out with his origami-inspired geometric shapes. Inside the gorilla, a series of balancing and rope components must be overcome to reach the 8.75 metre high conical tower, reminiscent of the Empire State building.

This inclusive, contemporary and powerful original creation enhances the cultural impact of the venue where it is situated.

Find out more

An architectural feature that feels at one with nature

Riverbank Park
Australia

This playground – installed on the banks of the Yass River, which runs through the ancestral homeland of an Aboriginal tribe – is designed to blend harmoniously into its natural surroundings, showing respect for the spiritual significance closely associated with the earth, landscape and plant life in this place.

The playground rises above its backdrop of rocks, logs and native plants with two tall and impressive round towers, linked by a rope tunnel suspended six metres in the air. Clad in slats and perforated panels and finished in neutral colours, these towers have an instant wow factor, catching

the eye and inviting children to come and enjoy the fun challenges and unique play experience they have to offer.

The first tower can be accessed via a gangway, allowing children with limited mobility to take full advantage of the space and its panoramic view over the surrounding park. An enormous 15-metre-long tube slide offers a thrilling way to get back down from the second tower. The slide also features windows to make it less scary for little ones and give everyone a chance to feel the connection between the light above them, the earth beneath them, and the sensation of movement as they glide down.

A wealth of information is available on our website

1 | Products and personal space

DIABOLO
MULTIPLAY EQUIPMENT

Diabolo is an essential component of any play area. With platforms ranging in height from 60cm to 177cm, and with many diverse play elements, the Diabolo range is suitable for children from 6 months to 12 years old.

The modular nature of this range allows for multiple combinations. These can be adapted to a specific age range, or used to encourage interaction between children with different capabilities due to age differences or abilities.

The classic 'must-have' play features are included on each structural element. Varied and complex on more elaborate combinations, these features offer children more opportunities to discover, be challenged and have fun.

Diabolo is available in two colour palettes: "Zingy" (yellow, orange and green) and "Pastel and Wood" (lagoon blue, apple green and oak).

Recycled plastic posts

A range that gives little ones the stimulation they need

6 months

5 years

The Diabolo Baby range is dedicated to early childhood. The structures are designed to encourage early learning, guiding young children through a sequence of activities that stimulate their motor and fine-motor skills and support role play and interaction with others.

All activities take place at ground level or a maximum height of 60cm. All play elements are varied, relevant, adaptable and modular.

Helping young children discover new motor skills

- ▶ On all fours, children move forward in a confined space.
- ▶ Moving forward on a slope.
- ▶ Holding narrow shapes that are raised and spaced apart.
- ▶ Moving in an area surrounded by empty space.
- ▶ Going underneath.

Developing their sensorimotor and psychomotor skills

- ▶ Encouraging fine motor skills through the movement of shapes along a defined path.
- ▶ Exploring how different objects look.
- ▶ Resolving play tasks using the manipulation of simple shapes that use thought, memory, learning and reasoning.
- ▶ Experiencing different textures (raised diamond shapes, grass effect, rough surfaces).

Supporting their social development

- ▶ Learning to play and interact with others.
- ▶ Developing their imagination through role play.
- ▶ Encouraging children to help each other.

KANOPÉ
MULTIPLAY EQUIPMENT

The Kanopé range, with its structures resembling wild grasses or tree trunks bent by the wind, invites children to venture into nature.

Children from two years of age can navigate a pathway that's horizontal or vertical, steep or moving. They can climb in all directions, clambering up and down numerous uniquely-shaped rope structures. They can pretend to be acrobats or tightrope walkers, or they can slide down a rope, a traditional slide, or take the plunge using the Speed Slide.

All play features fit with Kanopé's signature design - inspired by nature, with a contemporary, streamlined look.

The range is available in two styles: evergreen and oak effect.

KANOPÉ - THE TOWERS
MULTIPLAY EQUIPMENT

Kanopé is reaching for the skies with playful structures of between 4 and 8 metres in height.

For the youngest children, from the age of 2, Ka'Yop's enchanted trees offer a multitude of activities at each level: the lower section features a set of collaborative and inclusive play components. Play panels, sound-play features, a climbing net, moving seats and rotating play equipment are spread over the various structures. The upper part, with its lush green foliage, transforms the tree into a leafy cocoon that is home to a wide variety of motor and sensory activities.

These majestic, ethereal, transparent tall towers stand out in any environment. The asymmetric play houses perched at the top can be reached by climbing steep rope stairs. Large slides offer a guaranteed thrill ride on the way down!

2

THE KANOPÉ TOWERS

are models of accessibility and inclusion

Neither the size nor the height of a tower must pose an obstacle to group play among children with different abilities.

Kanopé Towers demonstrate this with access solutions and fun features tailored to children's disabilities that allow everyone to meet up and play together.

J56012®

See technical details on p. 78

1

LARGE TOWERS WITH A DIRECT CONNECTION ENSURE GUARANTEED GROUP PLAY

Ascent using a rope net and descent using a spiral slide for maximum challenges and sensations.

Transparent fencing so the user maintains visual contact at each level of the tower.

A first platform at a height of 1.80 metres allowing space for fun activities below.

1.80 m

Stairs with a built-in transfer platform.

A double slide to allow an accompanying person to slide alongside the child.

The concept of an **INCLUSIVE** Kanopé Tower

3 separate areas are defined according to a classification based primarily on the level of motor disability (an essential component in equipment design) and inspired by the GMSCF* classification.

Level 1
Children with slightly reduced motor abilities or children without disabilities.

Level 2
Children with motor disabilities that may use a mobility aid, are able to exit their mobility aid with appropriate support to explore the play equipment with or without assistance.

Level 3
Children with significant motor disabilities, who are unable to move independently from a wheelchair or move around.

Each area includes fun and practical components that also address specific needs for sensory and cognitive disabilities.

Spaces feature a modular design and can be combined to create a bespoke solution meeting all your needs, such as:

- ▶ The desire to create a fun and inclusive play solution for a specific disability category
- ▶ Additional fun components suited to different disabilities
- ▶ A solution tailored to the available budget
- ▶ Available floor space

J56009*

J56010*

J56011*

J56012*

*GMSCF = Gross Motor Function Classification System

2

A UNIQUE OPPORTUNITY FOR CHILDREN WITH MOTOR DIFFICULTIES TO ACCESS A SLIDE MEASURING 3 METRES IN HEIGHT

A tube slide, either straight or with very gentle curves to be used by children who do not have complete control over their lower limbs. Large peepholes to see out of and reassure the child and accompanying person.

It is accessed from a soft rubber ramp that allows the ascent to be made in either a horizontal position or standing.

Stairs with a built-in transfer platform.

+

The height of passages must allow them to be used by an accompanying person or an adult with a disability.

2

3

IMMEDIATE INCLUSION IN PLAY FOR CHILDREN IN WHEELCHAIRS OR WITH MOTOR DIFFICULTIES

Suitable ergonomics: ramp with an incline of < 6°, wide platform to facilitate easy movement in a wheelchair.

IXO
MULTIPLAY EQUIPMENT

The Ixo range speaks the language of pre-teens.

No longer satisfied with playing the same games as younger children, pre-teen want to be challenged - to test their strength, to prove themselves in the eyes of others, to make their own rules.

Inspired by modern architecture, the Ixo range is contemporary in style, with clean lines and transparent structures.

**ADVENTURE
THEMED EQUIPMENT**

Our Adventure-themed equipment transports children into the leafy undergrowth of the jungle. Whether climbing aboard a jeep or carefully crossing the suspension bridge, young explorers can go in search of a secret temple and come face-to-face with wild animals along the way.

Each structure is equipped with a range of play elements that challenge and stimulate the senses.

The use of an orange, brown and green colour palette, emphasises the tropical forest theme.

METROPOLIS
THEMED EQUIPMENT

The Metropolis range welcomes children to a world that draws its inspiration from the books of science fiction writers such as Jules Verne and H.G. Wells. The play structures are weird and wonderful machines, each complete with unique design details and imaginative play features.

The combination of stainless steel posts and copper coloured play panels reinforce the futuristic look of the equipment.

MEDIEVAL
THEMED EQUIPMENT

The Medieval theme transports children to a world of knights, castles and chivalry.

Symbols from this period such as turrets, shields and bridges adorn the play equipment. When combined with children's imagination the equipment becomes the starting point for a host of fun adventures. The numerous play panels add to the theme and test children's problem-solving skills.

ORIGIN' MULTIPLAY EQUIPMENT
SUSTAINABLE NATURAL WOOD EQUIPMENT

All children have the same dream of hiding away in a treehouse.

The multiplay structures in the Origin' range promise a number of original adventures in the heart of the natural countryside combining equipment with basic play features that will bring children together, including triangular towers with different platform heights, ladders, climbing ramps, fixed or moving bridges, tunnels, vertical nets, climbing walls, slides and sliding poles.

Splashes of colour truly bring out the originality of this range. The fence panels are finished in shades of green to give an extra touch of natural harmony with the surrounding environment.

The products in the Origin' range are available in PEFC-certified wood on request.

ORIGIN' THEMED EQUIPMENT

SUSTAINABLE NATURAL WOOD EQUIPMENT

Children love escaping to an imaginary world where anything can happen. Whether on land, at sea or in the air, they pretend to be explorers, seafarers, merchants or aviators. They produce and act out fantasy stories with plenty of twists and turns that epitomise their creativity.

The structures with their imaginative shapes offer a wealth of details for enhancing the play experience. Some provide traditional and must-have activities, while others contain countless accessories or play with perspective, such as optical illusions.

The highest combinations on offer stand over six metres tall and are adorned with unusual features, such as a stork's nest, the trees around the clearing and dilapidated cabins.

The products in the Origin' range are available in PEFC-certified wood on request.

ORIGIN' TRADITIONAL EQUIPMENT
SUSTAINABLE NATURAL WOOD EQUIPMENT

Swings, springers and roundabouts are firm favourites among children of all ages. They can be installed near each other or added to a play space built around a multiplay structure.

Comprising of sustainable natural wood boards, posts and beams, Origin' structures embrace the shape of the wood, which gives the playground a highly intensified natural look.

The products in the Origin' range are available in PEFC-certified wood on request.

ORIGIN' TRAIL EQUIPMENT
SUSTAINABLE NATURAL WOOD EQUIPMENT

The Origin' trail equipment offers different levels of difficulty. The most accessible items include stepping stones, beams and low gangways, which help children to work on their sense of balance and overcome their fear of heights.

The equipment gradually becomes narrower, higher and more challenging. Children can gain a foothold on the rounded beams, moving gangways and flexible ropes. Various techniques are used to cross the different items of play equipment. Those techniques gradually scale in complexity with the aim of helping children coordinate their movements and control their body in suspended space.

Finally, they can improve their technique, strength and self-control on the climbing equipment or structures where they need to use their arm strength to get from one side to the next.

The products in the Origin' range are available in PEFC-certified wood on request.

SPRINGERS
MOVING EQUIPMENT

Springers are an essential element of any play space for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they swing away wildly.

Springers are equipped with suitably-sized footrests and handles, so they're ergonomically designed for maximum user comfort and safety. Their playful and colourful shapes are based on familiar themes, designed to stimulate a child's imagination.

ROTATING EQUIPMENT

MOVING EQUIPMENT

Children of all ages love rotating equipment.

Younger children gradually learn to enjoy the exhilaration of speed on roundabouts. As children get older and more self-assured, they can test their balance and push their limits on more challenging dynamic structures that combine rotation and swinging.

CABLEWAYS
MOVING EQUIPMENT

Cableways offer an essential, fun aspect to active play areas for pre-teens and teenagers. Not only will they enjoy the thrill of gliding through space, cableways are also a great way to teach children of all ages to cooperate, take turns and share.

Young people can both challenge themselves and compete with others. They can develop their own technique and build strength and agility while they play.

SWINGS
TRADITIONAL PLAY EQUIPMENT

Swings are a traditional play item and an all-time favourite that has given many generations of children the sensation of flying through the air and the joy of seemingly touching the sky! Although the sheer pleasure that comes from swinging remains unchanged, swings are now available in all shapes and sizes.

Wraparound seats or braided rope seats just 40cm above the ground guarantee safety for the youngest of users. Older children can have fun together on the 1.20 metre diameter pod swing or the braided balancing rope. The hexagonal swing with its six sets of seats offers children an even greater set of challenges.

4

5

6

1 **Swing chains.**
Galvanised steel overmoulded with rubber (pod swing).

2 **Rotation system** fitted with bearings.

3 **PVC sliding rings** prevent wear on the metal parts.

4 The **rotation system** enables swinging in both directions. A safety chain strengthens the pod support (pod swing).

5 **Anti-wrap round rotation system.** Made of polyamide parts and stainless steel fixings.

6  The **inclusive seat** has a high, wrap-around seat made from rotomoulded polyethylene with holes to prevent water stagnation, and a rubber shock-absorbing system. A safety chain is provided across the front of the seat.

SLIDES
TRADITIONAL PLAY EQUIPMENT

Forever popular, slides are an integral element of a child's world.

For younger children, there are wider steps that provide a stable base for safe access, while older children climb up a ladder.

Straight or wavy slides, stainless steel tubular structures, polyethylene Kayak slides – the variety of shapes, lengths and materials provide multiple solutions for developing a play area and adapting it to any type of environment.

ACTI'NINJA TRAILS
CLIMBING & BALANCING EQUIPMENT

The Ninja trails are fun-sport obstacle courses intended to develop the physical fitness of children and teenagers aged from 6 to 14 years. They consist of modules that can be linked together and which have to be completed as quickly as possible using one's strength, balance, endurance and dexterity to beat the stopwatch that is triggered at the starting line.

The great variety of the proposed modules makes it possible to adapt the level of difficulty of the trails to the age of the children: easy for those aged 6 to 8 years, difficult for those aged 8 or over.

The graphic presentation with a coloured, learning-oriented soft surface makes it possible to create a dynamic, challenging environment.

ROPE TRAILS

CLIMBING & BALANCING EQUIPMENT

Rope circuits turn children into tightrope walkers!

They move along small, unstable surfaces, spaced tubes or inclined stepping stones, requiring constant balancing as they navigate from one obstacle to the next. This challenge develops and strengthens motor coordination, agility and concentration.

Each structure, regardless of its size, is an adventure playground delivering an experience that is both stimulating and fun: the moderate risk (strap and rope height: 40cm) inspires every child's courage and taste for a challenge, and every step they take boosts their self-confidence.

TRAMPOLINES

CLIMBING & BALANCING EQUIPMENT

Trampolines give children wings and are the ultimate in fun!

Trampolines are simple to use and available to children aged 3 and above. They develop motor skills, coordination, balance and muscle strength. In the air, children become aware of how their body feels and as a result improve their posture.

Trampolines rightly belong in any inclusive play area. Ground-level trampolines are protected by a frame with rounded edges and ensure easy access to the centre for children in wheelchairs with a helping hand from a carer or friend, so that they too can gently experience the sensation of bouncing.

The steady bouncing motion of the trampoline can have a calming effect on over-stimulated and autistic children.

ROPE STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Designed in 3D, rope structures allow children to take complete ownership of the space, making use of both the peripheral and inside sections of the equipment. Crossing requires concentration and good hand-foot coordination to best manage the instability of the ropes and, in some cases, the suspended stepping stones at the centre of the structures.

By going higher, children expand their perception of space. Although the same climbing techniques are used from start to finish, the most valuable lesson for children will be overcoming their fear of heights.

Rope structures can be connected to other types of play equipment, such as slides and climbing walls, or incorporate aerial trails to move from one module to the next without putting a foot on the ground.

CLIMBING STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Climbing structures attract children and teens who love climbing and playing at height.

Nets, climbing walls, ladders, horizontal bars, a 4 metre-high pole... the equipment is varied and presents different levels of difficulty and technique appropriate to the age of the users. Users are required to move across horizontal, vertical and sloping surfaces, which calls for balance, agility and coordination.

These structures also encourage children to play together. They can compare their skills, throw down the gauntlet or help each other overcome a difficulty and progress along the structure. The enjoyment of playing comes top of the list, which promotes interaction and socialisation.

GYMLUDIC® TRAIL & BALANCING MODULES
EDUCATIONAL & SENSORY EQUIPMENT

The GymLudic® trail and the balancing modules are ideally suited to educational programmes aimed at scaling up skills development and learning in young children through a series of actions requiring increasingly complex and coordinated motor skills. They encourage children to enrich and improve a wide range of abilities, including locomotor skills, balance and coordination, and how to conquer their fears.

GymLudic® is an educational play structure featuring up to 80 activities for stimulating children's motor skills.

This system is supplied as a compact, folding box and provides a number of exercise opportunities involving balancing, jumping, crossing, throwing and space management. Activities are concentrated in and around the box. They can be sequenced to form a trail or performed individually depending on the required learning objectives.

Thanks to its modular design and various accessories, teachers can provide scalable exercises with different levels of difficulty. Children can therefore enhance their motor and psychomotor skills over time.

The shape and complexity of the different balancing modules allow for a wide variety of crossing activities.

PLAY PANELS, AUDIO & MUSICAL PLAY

EDUCATIONAL & SENSORY EQUIPMENT

Engaging and fun, children enjoy using interactive play panels like Sensory Flowers and Tubophones.

Understanding play activity instructions on the panels help develop their observation and analysis skills. Performing the activities demands concentration and thought. It helps develop hand-eye coordination and strengthens their ability to plan.

Musical play activities stimulate their auditory perception and helps develop creativity and encourage interaction with other children.

SAND PLAY, WATER PLAY AND GARDENING
EDUCATIONAL & SENSORY EQUIPMENT

The handling of water, sand and soil is a great source of sensory experiences. Children enjoy themselves working with these materials whose properties allow a multitude of experiments. They refine control and coordination of hand movements.

They gain awareness of the concepts of shape, state, weight, volume... and learn to understand cause and effect relationships.

Gardening activities also help them understand how they can interact with nature and understand the notion of life growing. In addition, gardening can also help develop children's sense of smell.

INTERACTIVE PLAY EDUCATIONAL & SENSORY EQUIPMENT

Interactive play experiences combine physical and intellectual activities with technology. Designed for a connected generation, these play activities introduce sound, light and action into the activity. Visual and audio stimuli call upon juniors' cognitive functions, requiring them to use speed and responsiveness.

Group challenges also help develop team spirit, cooperation and cohesion in children.

FURNITURE & SIGNAGE

Leisure spaces are places to relax for all age groups, users and accompanying adults and successful design is achieved through the harmony created between play equipment, furniture and the environment.

Designing a play area, therefore, involves much more thought than just play aspects. Allowing children the freedom to play in a clean, hazard-free location protected from paths and roads is paramount. However, providing parents, carers and users the ability to rest, have a snack and chat also contribute to a successful leisure space.

Classic or contemporary in design, we have furniture suitable for every project setting, which will blend into any environment seamlessly.

Our signs are practical, aesthetic and fun, providing useful information for play area users. Text can vary depending on where the signs are installed.

SUSTAINABLE NATURAL WOOD

Our posts are made from natural Robinia wood, a type of hardwood known for being naturally durable and resistant to aggressive external factors such as insects, fungi or harsh weather, without needing to be treated with fungicides or insecticides. Robinia wood is also naturally rot-proof, making it a popular choice for construction and absolutely ideal for supporting heavy loads.

Our panels are made from Robinia wood or Douglas fir, a resinous tree species that combines outstanding mechanical properties with a high level of natural durability. It is resistant to fungi and wood-eating insects, making it a robust material. Its ability to withstand humidity also makes it ideal for use outdoors.

Since Robinia wood and Douglas fir are living materials, greying as a result of exposure to UV rays and cracks, will alter the appearance of the product over time, but this will not have any negative impact on its structural integrity.

We procure our materials from reliable and environmentally friendly sources to help ensure sustainable forest management. All of our sustainable natural wood products are available in PEFC-certified wood on request.

LAMINATED WOOD

Laminated wood is made up of layers of solid wood (often Fir or Scots pine) glued together. It is a very strong material and ideal for posts that have to carry larger loads.

Its qualities of resistance to dampness and pollution reduce the maintenance costs of the structures and ensure their durability.

Durability is further enhanced thanks to:

- Autoclave treatment of the laminated wood that provides in-depth protection from fungi, insects and termites.
- A surface coating that makes the wood waterproof and protects it from UV radiation.

The timber is free of defects (knots or splits) because they are identified and removed during the cutting work on the laminated strips. It is also free of splinters, which eliminates the risk of injury and is pleasant to touch.

OUR GALVANISED STEEL AND PAINTED GALVANISED STEEL POSTS

Our metal posts are made of 2.5mm thick galvanised steel to ensure the requirements for robustness and safety of play structures are achieved.

The posts provide a guarantee of longevity under widely varying climatic conditions thanks to the steel galvanisation process. The application of a polyester powder coating that is resistant to UV radiation and temperature variations provides further protection.

Proludic has developed its own round or square posts, with a fluted aspect that acts as an effective anti-graffiti screen. The two-toned grain finish reduces the appearance of scratches and ensures the aesthetic integrity of the posts.

OUR RECYCLED PLASTIC POSTS

Our recycled plastic posts are produced using post-consumer waste, mainly recycled food and drinks containers (polyethylene, aluminium).

This environmental impact reducing material is an inert and robust compound which is hard-wearing, resistant to UV light and fluctuations in temperature, and able to retain its shape over time. It is also rot-proof, making it a reliable option for outdoor applications.

It doesn't absorb things like paint or stains, so it is easy to clean (and resistant to graffiti) – and can usually be cleaned with just water.

This material doesn't require any treatment or regular repairs, which keeps maintenance costs down. This material is made in France.

OUR HDPE PANELS

Our panels, which are 19 mm thick, are mostly if not completely (80% to 100%) made up of recycled post-consumer and industrial production waste.

HDPE is known for its high tensile strength and resistance to temperature fluctuations and chemicals, making it an ideal material for ensuring the durability and robustness of assemblies.

Its UV and weather resistance make it especially well-suited for outdoor use, requiring no special maintenance.

It is also completely recyclable. Our HDPE panels are made in Europe.

COMPACT COMPOSITE

Our compact composite panels are 13mm thick and they are made up of softwood fibre (70%) and phenolic binder (30%). They show high levels of dimensional stability over long periods.

The material is unaffected by exposure to major temperature variations, guaranteeing the durability and solidity of the assembled elements. It is a versatile material that is not affected by contact with damp or abrasion.

The coloured surfaces are obtained using pigmented resins that provide good levels of resistance to ultraviolet radiation and aggressive cleaning products.

A range of colours has been specially developed by Proludic, enabling the company to highlight the originality of the equipment and its play aspects.

The platforms are made from a textured and non-slip compact material (HPL), 12.5mm thick.

OUR STAINLESS STEEL TUBES

Stainless steel is a material with high mechanical strength.

Our stainless steel tubes stand up to graffiti, bad weather and urban pollution; they require very little maintenance and are also resistant to even the most aggressive solvents.

OUR PAINTED ALUMINIUM PANELS

Aluminium is durable and strong, making it suitable for many applications. The natural formation of a surface oxide layer enhances its resistance to corrosion.

Application on aluminium of a coat of polyester epoxy paint provides high levels of resistance to UV radiation and temperature variations, ensuring long equipment life in diverse environments.

OUR PLASTIC PARTS

Proludic selects the various types of plastic based on their properties and intended purpose.

Our plastic parts are non-toxic and resistant to wear, impact, climatic variations and many chemicals. They ensure durability and long life of our play equipment.

All our plastic parts are marked with standard international identification codes, which ensure their traceability and recycling credentials.

OUR ROPES

Our ropes are made of corrosion-resistant galvanised steel wire cable strands covered with polyester. The multi-stranded wire cables remain flexible whilst resisting distortion and withstanding heavy loads.

The strong and durable polyester covering ensures user comfort and protection.

OUR FIXINGS

Our fixings are made of stainless steel to ensure the excellent robustness of our assemblies and resistance to wear, corrosion and climatic variations.

All fixing components are protected by anti-vandal polyamide caps.

OUR MECHANICAL SYSTEMS

Our experience has shown that our products are exposed to extreme mechanical stress.

This has led us to develop specific parts to guarantee an optimum level of comfort, durability and strength. The in-house systems we have developed ensure the reliability of our products while preventing wear, distortion and breakage of mechanical parts.

HERE ARE SOME EXAMPLES:

Springers

The support bracket, made from filled polyamide, provides exceptional resistance, safety and durability to the system.

Swings

The seat mounting brackets are designed to withstand heavy loads. They are made from stainless steel wire and are gently rounded in shape to ensure user safety.

PVC sliding rings limit wear to metal parts caused by swinging movements over time and extend the product life.

Rotation systems

The components used in our rotation systems are selected for their mechanical qualities and guarantee the reliability and robustness of the equipment.

Encased or inserted into connecting parts, our rotation systems are both waterproof and aesthetic.

11 GUARANTEES

Proludic is committed to the quality and durability of its products. In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Lifetime guarantee against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Posts and supporting structures (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes
- Panels (coloured compact / non-slip compact / high density polyethylene)

25 years against structural failure on our sports and play equipment due to material or manufacturing defects on lacquered plywood panels and non-slip plywood panels.

15 years against structural failure on our sports and play equipment due to material or manufacturing defects on the solid wood planks and timber frame posts.

10 years against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Metal components (with the exception of springs, moving or mechanical parts and fixings)
- Planks and treated timber frame posts
- Metal crimps and rope assemblies

5 years against structural failure on our sports and play equipment due to material or manufacturing defects on:

- Springs and mechanical systems
- Moulded or rotary moulded plastic parts (with the exception of moving parts)

2 years against material or manufacturing defects on component parts.

These guarantees include the provision of spare parts or free repair but does not include installation on-site.

The colours reproduced in this brochure may not be true to life, Proludic reserves the right to change specifications and make product improvements to any of our products at any time without notice. Information in this brochure was correct at the time of printing. While every effort has been made to ensure the accuracy of information, Proludic cannot accept any responsibility for any errors or omissions and this brochure does not form part of any contract.
